EPR402 Project Progress Meeting #3 (Group Meeting)

NetLab B

- Agenda: Discuss project proposal, budgets and general progress update
- Half students' proposals ready to be signed off and a few need to do some more work
- Submission is due 4th May for proposal at midnight
- Individual meetings next week – proposal language edited by next week
- Checkout of lab book at each individual meeting – your deadline time is your meeting time
- Budgets – money available for group as a whole - a departmental budget that can be used if multiple people need same component – hardware stays in hardware store post-project
- Next milestone – generate a provisional budget for project
- Budgets usually due in mid-May – have to fill in claim form to get money back later in year
- Potentially free 3D printing in study center for Project
- First formal literature review due at start of second semester alongside first semester report and Project plan – work on it sooner as one of the project milestones
- Plan a month in second semester for final report
- Don't underestimate ERP + workload in second semester
- Mr. Grobler will discuss outline of final report in mid-October in an individual meeting
- 10th May – Group meeting where all students will present their project with a slideshow and describe their project and progress
- Show debugging + how your project actually works under the hood – what is the project doing and show underlying processes – extra marks in final project demo
- Mitch project - amount of software to implement from first principles is substantial and so needs to be worked on as soon as possible
- Hardware projects – get your components and design done soon so can acquire hardware
